Vision7G™

The worlds truly Portable, Simple high quality wireless Surveillance.

Vision7G™ is a new portable multi-band wireless network security audio/video appliance developed by Diamond Quest, Inc.

The Vision 7G offers customers the benefits of powerful, high end wireless surveillance in a simple package, Powered by cutting-edge Genetec's IP video surveillance software, Omnicast.

One button out-of-the box solution provides pre-configured four Axis M1031-W cameras, up and recording in less than four minutes.

Once powered up, the system is recording audio and video on motion sensing via physical PIR detectors embedded into the cameras or by manual recording. The user can activate alarms over any network including out of the box configuring for flashing lights and audio from included cameras.

Typical wireless ranges are 1500 and 2500 feet radius LOS or two stories above and below, 100 foot radius with a minimum guaranteed frame rate of 8fps at a resolution of 640x480.

Vision7G is positioned to sell directly to end-users with absolutely no setup involved. Options, including camera choice and add-ons are available. Diamond Quest is currently seeking Distributors, Dealers and Integrators.
